

Ginegar Black and White Embossed Mulch Film

Ginegar's mulch films are advanced multi-layer mulch films that are manufactured using cast (flat die) extrusion method. Offering UV protection, this film is available in embossed (cast) in a wide range of thicknesses and widths according to specific growers' needs, specifications and crops.

The cast production method involves embossing while the material is hot, thereby changing the surface of the sheeting and endowing it with greater flexibility, softness and strength. This allows better adherence of the sheeting to the ground surface, and is particularly suitable for crops grown on raised beds.

Ginegar white mulching sheet reflects radiation to prevent the overheating of seedlings, plants and fruit, enhances photosynthesis and repels pests; and the black color prevents the penetration of light and reduces the germination of weeds. These films are recommended for vegetables, flowers and orchards.

Features:

- Weed control
- Earlier flowering
- Output increased
- Better fruit size
- Flower dropping controlled during rainfall
- Control in fungal diseases
- Fruit rotting by soil splashing during rainfall controlled
- Pest control by 25%
- Saving in water consumption

Product Detail

Brand	Ginegar
Thickness (microns)	25
Color	Black and white
Length	1000 mtr
Width	1 mtr, 1.2 mtr

Agriplast Tech India Private Limited
