

SombraSol Liquid Shading Agent

SombraSol Liquid Shading For Greenhouse Film is a liquid shading product from Mardenkaro Holland used to apply a temporary but even shading coat to plastic greenhouses. SombraSol will protect your crop from too much solar radiation and is highly wear-resistant.

How To Apply:

SombraSol is easy to apply using a simple, commonly-used spraying device. As it is liquid, it does not form lumps, producing a more even coating than other powder-based shading products.

How To Remove:

SombraSol will naturally wear over the course of a season. It can be removed by brushing in combination with citric acid. SombraSol is not harmful to humans, crops or the environment.

Advantages of SombraSol

Simple to use

Sprays easily

Clear white shading coat means optimum heat reflection

Safe for humans, crops and the environment

Wear-resistant; lasts up to 4 (depending on weather conditions)

Economical; usually only needs one coat per season

Using Sombrasol:

Sombrasol should be stirred into clean water. We would recommend applying SombraSol during fast-drying weather conditions. For the best results, apply SombraSol to a clean, dry greenhouse surface. Approximately 2,000 litres of spraying liquid (SombraSol + water) is needed for 1 hectare (10,000m²).

Product Detail

Minimum Order Quantity	1 Number
Brand	Agriplast
Material	Liquid Shading agent
Use	On greenhouses to reduce temperature
Item Code	SombraSol
Port of Dispatch	Hosur / Ahmedabad
Production Capacity	300 buckets
Delivery Time	immediate
Packaging Details	In Plastic containers
Capacity	20 Kg
