

Fruit Shield Fruit Cover 6 inch/8 Inch Diameter

Agriplast Fruit shield cover, made of non-woven polypropylene material, are used in agriculture for the purpose of protecting the crops from both biotic and abiotic stresses. Use of crop cover in open fields leads to faster and healthy plant growth, reduced the usage of agrochemicals, prolonged harvesting, better fruit quality and opportunity to grow crops during off-season also.

Features:

- Protects from sunburn
- Prevents black spot on the fruits
- Provides optimum microclimate for growth of fruits by allowing passage of air, water, moisture, and sunlight
- Prevents fruit cracking
- Saves cost by minimizing the usage of pesticides
- Supports organic farming
- Encourages consumption of pesticide residue-free fruits
- Protects from birds and animals
- Protects from fruit flies and other harmful insects
- Increases natural shine and colour in apple and pomegranate
- Clean fruit of uniform size and colour, bigger fruit size
- Facilitates the production of export quality fruits fetching a good market price.
