

Crop Shield Crop Cover 17 GSM White 2.13 mtrs

Crop covers, made of non-woven polypropylene material, are used in agriculture for the purpose of protecting the crops from both biotic and abiotic stresses. Use of crop cover in open fields leads to faster and healthy plant growth, reduced usage of agrochemicals, prolonged harvesting, better fruit quality and opportunity to grow crops during off-season also.

Additional Information:

- Low cost protected cultivation solutions for open field farming
- Protects crops from both biotic and abiotic stresses – mini-greenhouse effect
- Faster and healthy plant growth
- Reduced pesticide usage
- Helps in organic farming
- Prolongs the harvesting period
- Increases pollen life
- Good fruit quality
- Opportunity to grow crops during off-season also
- Permeable to both air and water
- Provides diffusion effect
- Maintains Micro-climate around the plant.
